

## Trade-In Offer

For a limited time, SCLogic is offering up to **\$250 trade-in credit for each Palm device** toward the purchase of a Motorola MC55 or Janam XM65W.

**Call 888.700.7027 or email [info@sclogic.com](mailto:info@sclogic.com)**

We will gladly discuss your upgrade options with you and help you determine the best models to meet your requirements.

We will provide you with information regarding any current SPT1800 service contracts you may carry with us and after upgrading, we will send you an updated service contract that includes your new equipment serial numbers.

## 2009 Premium and Standard Mobile Computing Options

One of the things that really sets SCLogic apart from other tracking software companies is our mobile computing expertise. SCLogic is committed to ongoing research and integration of its software with the latest mobile computing devices so we can offer you the best hardware and peripherals to complement your SCLIntra™ tracking system.

SCLogic is one of only a handful of Motorola Premier Business Partners (PBP) in the United States. To earn Motorola PBP status, a company must maintain a high level of product knowledge, hold multiple certifications and achieve significant mobile computing hardware sales milestones.

Our desire to expand our mobile offerings lead to an exhaustive evaluation of several handheld devices. After careful consideration, SCLogic decided to become a Janam Certified Partner and to balance our suite with the Janam XM line of terminals. Janam produces a powerful, rugged handheld at a very competitive price.

Currently, SCLogic is pleased to recommend these models for use with SCLIntra:

### Premium Rugged Option (WWAN)

#### MC55 Enterprise Digital Assistant (EDA)

The MC55 brings a new level of flexibility, functionality and rugged design to pocket-sized mobile devices, providing task workers and managers with the power to streamline business processes, increase productivity and improve customer service.

The smallest and lightest Motorola rugged EDA, the MC55 packs the power of a cell phone, mobile computer, barcode scanner, high resolution color camera and pager — all into a single device.

Designed to meet mobile worker, business application and IT requirements, this easy to use and easy to carry business-class device offers true consumer styling as well as enterprise manageability, security and scalability.

### Standard Rugged Option (WLAN)

The Janam XM65 is a Windows Mobile device that brings together power, performance and price advantage like no other in its class. Small, lightweight and fully rugged, the XM65 is the mobile computer that workers will want to use.

Advanced barcode scanning, robust WLAN communication and long battery life make it the Windows Mobile solution that businesses will prefer. And its remarkably low price makes it easy to own.

### About SCLogic, LLC

SCLogic is the leader in package tracking solutions. We design, develop, deploy and support our software, SCLIntra. With prompt, live technical support, we are responsive people you will enjoy working with now and in the future. SCLIntra Enterprise Package Tracking Solutions are available for purchase or lease; on premise or hosted; you decide, we deliver.
